TomTom XL v2 **GB Maps**

Only
£127.61
inc VAT

Your unit is 100% TomTom factory-refurbished, meaning it has been 'remanufactured' by the original manufacturer and is considered to be 'as new'. The unit has been thoroughly checked and tested by the manufacturer to ensure it is of the same standard and quality as a new item.

Factory-refurbished products sometimes may include units that have never been used. Although on some occasions they may be dispatched in plain packaging, these products are backed by the manufacturer's full warranty, unless otherwise stated. This makes such devices great value for money without compromising on quality.

- Pre-Installed Safety Camera Alerts

Refurbished by TomTom

Why buy refurbished?

Refurbished items are devices which have been returned to the manufacturer for a variety of reasons, including unsold stock from a retailer, discontinued models, unwanted items or faulty products. Following repair/restoration and rigorous testing these devices re-enter the market to be sold on as 'refurbished items'.

One of the leading benefits of purchasing refurbished items is obviously cost. You can make massive savings whilst still be able to purchase top quality products. Refurb is an attractive option when you're looking to tighten the reins on spending yet not compromise on quality.

In addition to this, there are also environmental benefits to buying refurb. Imagine what would happen to unwanted units if devices were not refurbished and returned into the channel?

All in all, there are quite a few pluses in buying refurbish:

- A refurb unit offers incredible saving over new
- All units are shipped with a full twelve month manufacturer warranty
- Where else can you buy an original TomTom satnav for such an amazing price?
